

## Guide to Application and Studies at a Bavarian Studienkolleg

---

### Please keep in mind:

Ukrainian High School graduates cannot immediately start studying at a Bavarian University or University of Applied Sciences, but they have to visit the so called “Studienkolleg” for one year first. At the Studienkolleg they will acquire all qualifications needed in order to begin their studies in Bavaria.

The application at a Bavarian Studienkolleg is possible **only with a written assignment from a University or University of Applied Sciences**. Please contact the University you plan to study at as your very first step!

The admission to a Studienkolleg is only possible with **sufficient German language knowledge, at least level B1+/B2**. All classes as well as exams and the entrance exams will be held fully in German.

Students who **already completed the first years (2 semesters) at a Ukrainian university** do not need to visit the Studienkolleg, they can start the enrollment process at a University or University of Applied Sciences immediately. **Please get in contact directly with your desired university to ask about specific rules and possible alternative solutions.**

### Step 1 – Application at a Bavarian University or University of Applied Sciences

The first thing you need to do is apply to the university or college for a degree program. All degree programs as well as further information on the topic of studying in Bavaria can be found here: [www.study-in-bavaria.de](http://www.study-in-bavaria.de)

The International Office of the University or University of Applied Sciences is your best contact person. They can provide you with all needed information, which documents you will need to bring and at which Studienkolleg you will study at. You will get important documents for the admission to a Studienkolleg from your University or University of Applied Sciences. Only with these documents will the admission to a Studienkolleg be possible at all.

Applications for summer term until	<b>15<sup>th</sup> of January</b>
Applications for winter term until	<b>15<sup>th</sup> of July</b>

### Step 2 – Admission to a Studienkolleg

When the application at your University or University of Applied Sciences is finished, you’ll be directed to the Studienkolleg relevant for you.

Here you will be enrolled in Schwerpunktkurs (classes focused on the degree you plan to study later) after taking and passing the entrance exam. There are two Studienkollegs in Bavaria – Studienkolleg München and Studienkolleg Coburg – each with slightly different course catalogs and entrance requirements.

### München

Studienkolleg der Universitäten des Freistaats Bayern (Universities)

---

The [admission](#) will be finalized by the Universities.

It is **not possible** to submit an admission directly to the Studienkolleg München! The University will send you an invitation to Studienkolleg (important document!)

The entrance exam takes place in **February** for the **summer term** and in **September** for the **winter term**.

**All applicants** must take the entrance exams in the subject German. [Informationen zum Deutsch-Test](#).

Applicants for the **courses T, M and G** must take an additional exam for the subject Mathematics. [Informationen zum Mathe-Test](#).

Applications for the **courses W and G** must take an evaluation test for the subject English.

The Studienkolleg München is a state institution. The preparatory studies (2 semesters) are free of charge and end with the Feststellungsprüfung (FSP – final positioning exam). During their time at the Studienkolleg München, the students are enrolled at either LMU or TUM.

### Further information on studying at the Studienkolleg München

The Studienkolleg offers four focus courses. Each course has a duration of one year (2 semesters) and is a preparation for the following degree programs:

- **G-Kurs: social science and humanities**

The G-Kurs is for students planning to study for example:

Humanities (history, cultural science, philosophy, communication, etc)	Political science
Art	Social science, as long as they're not a part of W- Kurs
Music science	Psychology (also a M-Kurs)
Languages	Law (also a W-Kurs)

Classes and topics of the G-Kurs [here](#)

- **M-Kurs: medicine and biology**

The M-Kurs is for students planning to study for example:

Agricultural science	Land use
Biochemistry (also a T-Kurs)	Medicine
Bioinformatics (also a T-Kurs)	Molecular biotechnology
Biology	Pharmacy
Chemistry (also a T-Kurs)	Psychology (also a G-Kurs)
Nutritional science	Sports
Forestry science	Veterinary medicine
Geoecology	Dentistry

Classes and topics of the M-Kurs [here](#)

- **T-Kurs: technical and mathematical degrees, natural sciences**

The T-Kurs is for students planning to study for example:

Architecture	Landscape architecture and planning
Civil engineering	Aerospace engineering
Bioinformatics (also a M-Kurs)	Mathematics
Bioprocess engineering/ renewable resources	Mineralogy
Brewing and beverage technology	Physics
Chemical engineering	Technology and biotechnology of food
chemistry (also a M-Kurs)	Technomathematics
Electrical engineering electrical engineering and information technology	Environmental engineering
Geography	Surveying
Geology	Material science
Computer science/informatics	Information systems (T-Kurs at TUM! Possibly a W- Kurs at other universities)
	Industrial Engineering (also a W-Kurs)

Classes and topics of the T-Kurs [here](#)

- **W-Kurs: economics and social sciences**

The W-Kurs is for students planning to study for example:

## Guide to Application and Studies at a Bavarian Studienkolleg

---

Business administration

European economy

Financial and economic mathematics

Law (also a G-Kurs)

Political science (also a G-Kurs)

Sociology / Social science

Sports economics

Economics

Economic geography

Industrial engineering (also a T-Kurs)

Business education
