

RNA Lecture Series Part III

Modern methods to analyze features of ribonucleoprotein particles

H 53 | 17.00 h

Methods
0.5 CP
Rigel
course

Wednesday | April 24, 2019

RNA localisation - concepts and methodology

Dr. Imre Gaspar, Institute of Molecular Biotechnology,
Austrian Academy of Sciences, Vienna

Wednesday | May 8, 2019

*NMR-based structural analysis of biomolecules
at atomic resolution*

Prof. Dr. Werner Kremer, Biophysics I

Wednesday | May 22, 2019

Computational modeling of RNAi data

Prof. Dr. Rainer Spang, Institute of Functional Genomics

Wednesday | June 5, 2019

Genomes of everything for everyone? Environmental genomics coming of age.

Prof. Dr. Alexander Probst, Aquatic Microbial Ecology,
Biofilm Centre, Universität Duisburg-Essen

Wednesday | June 19, 2019

*Large-scale functional genomics with CRISPR/
Cas9 and single-cell transcriptome readouts*

Dr. Daniel Schraivogel, EMBL Heidelberg

Wednesday | July 3, 2019

Structure probing of RNAs and RNPs

Dr. Sébastien Ferreira-Cerca, Biochemistry III

Wednesday | July 17, 2019

*ChIP & beyond - global analyses of transcription
factor function and binding*

Prof. Dr. Michael Rehli, Internal Medicine III
