

Wissenschaftliches Kolloquium des Sonderforschungsbereiches 960 und des Biochemie-Zentrums Regensburg

Wintersemester 2018/2019 | Universität Regensburg | H 53

Thursday | 04.10. | 14.00 h

Prof. Dr. Anja Geitmann (McGill University, Montreal, Canada)
From polysaccharide to polyhedron – how plant cells make shapes
Host: Thomas Dresselhaus

Tuesday | 09.10. | 17.00 h

Prof. Dr. Alwin Köhler (Max F. Perutz Laboratories, University of Vienna, Austria)
Lipid metabolism of the inner nuclear membrane
Host: Sébastien Ferreira-Cerca

Thursday | 11.10. | 14.00 h

Prof. Dr. Harald Schwalbe (Frankfurt University)
NMR investigation of RNA -based regulation
Host: Remco Sprangers

Monday | 15.10. | 14.00 h | DE.2.121

Prof. Dr. Matthias Wilmanns (EMBL Hamburg)
Structural investigation of the holo complex of a mycobacterial type VII secretion system
Host: Reinhard Sterner

Tuesday | 16.10. | 17.00 h

Prof. Dr. Udo Bläsi (Max F. Perutz Laboratories, University of Vienna, Austria)
Architectural principles of metabolic regulation by Hfq and Crc in Pseudomonas aeruginosa
Host: Reinhard Sterner

Thursday | 25.10. | 14.00 h

SFB960-Inhouse Seminar

Thursday | 08.11. | 14.00 h

Dr. Sabine Müller (Zentrum für Molekulare Biologie der Pflanzen (ZMBP), Tübingen)
Host: Stefanie Sprunck

Thursday | 15.11. | 14.00 h

Prof. Dr. Bettina Böttcher (Cryo-Electron Microscopy, Universität Würzburg)
Host: Christine Ziegler, Reinhard Rachel

Tuesday | 20.11. | 17.00 h

Prof. Markus C. Wahl, PhD (Structural Biochemistry, Freie Universität Berlin)
Molecular mechanism of an all-purpose transcription anti-termination protein
Host: Gunter Meister

Thursday | 22.11. | 14.00 h

SFB960-Inhouse Seminar

Thursday | 29.11. | 14.00 h

Charlie Scutt (Laboratoire Reproduction et Développement des Plantes, Lyon, France)
Host: María Flores Tornero

Tuesday | 04.12. | 17.00 h

Prof. Dr. Alexander Hüttenhofer (Medizinische Universität Innsbruck)
NcRNAs als Regulators in Splicing and Protein synthesis
Host: Gunter Meister

Tuesday | 11.12. | 17.00 h

Dr. Sebastian Falk (MPI München)
Structural and functional insights into the nuclear RNA Exosome
Host: Christoph Engel

Thursday | 13.12. | 14.00 h

Prof. Dr. Camilo Perez (Biozentrum, Universität Basel)
Host: Christine Ziegler

Tuesday | 18.12. | 17.00 h

Prof. Dr. Stefan Raunser (Max Planck Institute of Molecular Physiology, Dortmund)
Host: Christine Ziegler, Reinhard Rachel

Thursday | 20.12. | 14.00 h

SFB960-Inhouse Seminar

Thursday | 10.01. | 14.00 h

Dr. Olivier Duss (The Scripps Research Institute)
Early co-transcriptional ribosome assembly in real-time
Host: Remco Sprangers

Tuesday | 15.01. | 17.00 h

Prof. Dr. Matthias Geyer (Institute of Innate Immunity, Universität Bonn)
Host: Christoph Engel

Thursday | 17.01. | 14.00 h

Dr. Tobias Warnecke (Imperial College London)
Exploring the evolutionary origin of histone-based chromatin organisation
Host: Dina Grohmann

Tuesday | 22.01. | 17.00 h

Prof. Dr. André Antunes (Edge Hill University, UK)
With a grain of salt: Exploring life in deep-sea brines
Host: Harald Huber, Annett Bellack

Thursday | 24.01. | 14.00 h

SFB960-Inhouse Seminar

Tuesday | 05.02. | 17.00 h

Prof. Dr. Regine Kahmann (Max Planck Institute for Terrestrial Microbiology, Marburg)
Pathogen effectors to go: unexpected insights from essential secreted effectors of Ustilago maydis
Host: Karina van der Linde

Thursday | 07.03. | 14.00 h

Prof. Dr. Maria Sasi Conte (King's College London)
Insights into protein-RNA recognition from the La-related protein superfamily
Host: Gunter Meister

Foto: Tobias Beck
