6. Overall impression

6.1) What do you like best about this course or what do you dislike the most?

- I enjoy the practicality of the course, and the abundance of examples relating to each topic discussed.

The group project was a breath of fresh air compared to other courses.

The group work in class allowed the otherwise small number of participants to interact, which was great, however perhaps randomising the groups some more in the future might break a bit of the monotony of being in the same groups.

- I like the teaching methods

I'm not sure if I gained more interest for social enterprises as a future job opportunity.

- I really like the fact that the course is very interactive, and the lectures are very dynamic, so it is hard to feel overwhelmed by it. Additionally, we do a lot of activities in class to apply what we are learning, which I find to be very helpful.

Lea is a very good a very good instructor. It is clear that she is very passionate about the topic that she is teaching, and she is very successful transmitting that to the students. It is very easy to follow her explanations.

I also really appreciate that we use course hours to work on the group projects.

- I really like the way how Prof. Cassar teaches and she also cares a lot about her students.

The content of the lecture is really interesting and makes you think about our society and social problems.

- It feels like the topics and delimitations are very fuzzy to delimit, they are just bullet points and therefore difficult to memorize for the exam.

- Like: Idea or Building Start ups,
Dislike: Gruppe Work

I Prefer working on my Own

- Positive: Interaction and discussions, the instructor remembered our names and is really motivated

- The interaction Model ist great! Kind Regards Philipp S

- The mission behind it. Using entrepreneurship to do things.

- The way contents are given are really interesting as well as given in an interactive learning method. Also, the final project of the semester is a good way to develop all the ideas learned during the classes.

- I like the social aspect, and helping against social justice

- it is a lot of stuff to memorize

- the course was very interactive and it is a strong point. In France, I had courses where the professor spoke for 1 hour and nobody else. The way it is here is better, the student feels more implicated in the subject and there is a real exchange.

6.2) Comments about and suggestions for the accompanying practical course:

- -

- Kind regards phillii

- Learn more theoretical stuff, to directly apply to the practical stuff

- Maybe less statistical talk, but I understand that it is probably necessary

- The tutorial consisted most of the time of group working which was also interesting.

- it is a lot of stuff to memorize
